EDUCATION

Plattsburgh University | Bachelor of Science

Plattsburgh, NY

Major in Computer Science; Minor in Web Design and Programming

WORK EXPERIENCE

Quality Assurance Engineer

Remote

Data Annotation Tech

2024-Present

- Code Review: Reviewed and optimized code for AI model training, focusing on backend performance and data integrity.
- Testing and Quality Assurance: Developed and executed automated tests for backend APIs, ensuring reliability and accuracy.
- Collaborated with cross-functional teams to enhance backend systems, ensuring high-quality data for AI training.

Software Solutions Intern

Plattsburgh, NY

Plattsburgh University Technology Department

2021-2024

- Worked with a team to diagnose and resolve backend issues for internal university applications, improving system performance.
- Collaborated with multiple teams from the Technology Department with the main focus on debugging and ensuring smooth operations for all campus websites, servers, and applications providing service to over 8000 daily users.
- Leveraged ServiceNow platform for ticketing campus issues and streamlined workflow management

PROJECTS

AI Powered Storyboarding Tool | Next JS, Typescript, React, Tailwind CSS, Firebase, Google Gemini, Open AI, Playwright, Git

Live Demo: <https://raphaelsackey.github.io/personal-port-website/#/projects>

- Designed and built an AI-powered web application using Next JS that enables users to generate dynamic storyboards from user-provided prompts.
- Integrated a custom AI service for generating storyboards based on fully user-customizable templates ensuring originality and character consistency throughout the entire storyboard.
- Utilized Firebase Firestore for user and project data storage, ensuring scalability and reliability.
- Implemented a backend infrastructure that supports generating and storing images in Firebase Storage, with secure login and authentication using JWT.
- Implemented a fully interactive UI that enables users to fully customize story frames and download fully custom and unique storyboards.
- Utilized GitHub Actions for CI/CD operations and Vercel for deployment.

Full Stack Local Job Search Application | JavaScript, Node JS, React, Python, Flask, AWS RDS, MySQL, Cypress, Git, Google Cloud

Code Demo: <https://raphaelsackey.github.io/personal-port-website/#/projects>

- Developed a responsive web application using React JS, designed to help local community members find and manage local, non-professional job opportunities such as errands, lawn mowing, and other similar tasks.
- Built a robust backend using Python, Flask, AWS RDS, and Google Cloud services to handle high-volume user interactions.
- Designed and implemented a scalable MySQL database hosted on AWS.
- Used Cypress for end-to-end automated testing, improving system reliability.

Mobile Machine Learning Cooking Assistant | Python, Flask, Flutter, MySQL, Deep Learning, Image Recognition

Live Demo: <https://raphaelsackey.github.io/personal-port-website/#/projects>

- Led a team of student engineers to develop a mobile application that used image processing to suggest recipes to users.
- Trained an image recognition AI model with 90% accuracy using Python and utilized external APIs to provide unique recipes.
- Led weekly Scrum meetings, following Agile methodologies throughout the project lifecycle to enhance collaboration, efficiency.

ADDITIONAL

Technical Skills: Advanced in Python, JavaScript, TypeScript, React, Next JS, HTML/CSS, Git; Proficient in C, C++, SQL.

Awards: Dean's List 2022 - 2024
